PROFILE STATEMENT:

Highly motivated and detail-oriented Software Engineer with a strong foundation in computer science and hands-on experience in designing, developing, and deploying scalable software solutions. Adept at collaborating with cross-functional teams to drive innovation and meet project goals. Eager to contribute technical expertise and a growth mindset to a dynamic software engineering role.

EXPERIENCE:

1. Vivasoft Limited (Jan 2024 – Present) – Senior Software Engineer

Responsibilities:

- Building and maintaining cross-platform mobile applications with Dart and Flutter.
- Building and maintaining plugins with native Android and iOS.
- Communicating with stakeholders to find the best possible output for existing and upcoming features.
- Research and development for upcoming features.
- Mentoring junior developers.

Projects:

- **bKash Customer App:** As the largest mobile financial service (MFS) in Bangladesh, bKash offers a secure and reliable way to make payments. I had the opportunity to contribute to Pay-Bill, Education-Pay, Payment, Send Money, Mobile Recharge, Electronic Toll Collection, Insurance Marketplace, Savings, NPSB and Notifications feature of this app. As a part of the core team, I had the opportunity to make continuous improvements and optimizations for a better user experience.
- **PiHR:** PiHR is a one-stop, intuitive, simple to use and effective for managing the “people basics” of the organization. I worked in the tracking plugin (pi-tracker), employee analytics, payroll and did many enhancements and optimizations in this app. Also maintained the CI/CD pipeline of this app.
- **Financfy:** Accounting and bookkeeping software for small businesses that automate business workflows and save time. I had the opportunity to build and release the first version of this app from scratch.

2. Southtech Limited (Jun 2021 – Dec 2023) – Programmer

Responsibilities:

- Building and maintaining cross-platform mobile applications using Flutter framework.
- Maintaining legacy native android projects using Java.
- Managing app CI/CD pipeline with CodeMagic.
- Building microservices with Java Spring Boot framework.
- Managing CI/CD pipelines and deployments using Docker and Kubernetes in bare-metal servers.
- Research & development for new technologies and POCs.
- API load testing with JMeter.
- Knowledge sharing across teams.
- Client management and communication.

Projects:

- **Primary Student Profile:** This is a government project for the Directorate of Primary Education of Bangladesh, collaborating with CRVS Cabinet Division, BDRIS and Bangladesh Election Commission. Core technologies in this project include Flutter, Java Spring Boot framework, Angular, Oracle DB, Docker and Kubernetes. I got to work on both the mobile app and web app simultaneously for this project.
- **AFS (Ascend Financial Solutions):** AFS is the pioneer of microfinance solutions in Bangladesh. It has been contributing significantly to the growth of Bangladesh’s microfinance industry. Core technologies used in this project are Flutter, Java Spring MVC, JSP, MySQL and ActiveMQ. I had the opportunity to work on both the mobile app and the backend service in this project.

- **Scaled:** Scaled is a Human Resource Management software. I oversaw the maintenance and release management of this app which was freshly migrated from native to Flutter.

3. BornonIT (Jan 2020 – May 2021) – Jr. Software Engineer

Responsibilities:

- Building and maintaining cross-platform mobile applications using Flutter framework.
- Maintaining legacy android projects.

Projects:

- **Aro's Express:** Aro's Express is a logistics and door to door delivery service provider. Technologies used in this project include Java Spring Boot framework and MySQL database for backend and Flutter framework for mobile application.
- **BDInfo Rajbari:** A project from Rajbari Deputy Commissioner. Main purpose of this application is to store birth registration information of newborn across the different Unions of Rajbari District. Technologies in this project consist of Java Spring Boot framework and PostgreSQL for backend and Flutter for mobile application.
- **Heilo:** Heilo is an EdTech product for an aspiring startup. Heilo provides an offline home tutor service. It uses sslcommerz as payment gateway, Firebase as backend and Flutter framework for mobile application.

4. Kothon (Jan 2019 – Dec 2020) – Co-Founder & Software Engineer

Responsibilities:

- Designing and building PBX solutions.
- Building backend services to integrate with PBX servers.
- Building native and cross-platform mobile applications with Flutter.
- Research & Development.
- Managing a technical team.

Projects:

- **Kothon:** It is a VoIP mobile application built using Dart & Flutter. It uses the power of Private Branch Exchange (PBX) and dedicated backend to communicate with others. Technologies used in this project include Asterisk, Java Spring framework, Native Android, iOS and Flutter.

TECHNICAL SKILLS:

- Android and iOS application development using Dart and Flutter.
- Plugin development with native Android and iOS.
- Backend service development with Java Spring Boot, PHP Laravel and Go.
- Programming knowledge on Java, Go, Python, Kotlin, Swift, Javascript and PHP.
- Linux System Administration.
- CI/CD with GitHub Actions, CodeMagic and CircleCI.
- Research & Development.
- Documentation, Version Control with Git and SVN.
- Using AI Agents to build internal tools and proof of concepts.

EDUCATION:

North South University (2015 – 2020)

Bachelor of Science in Computer Science & Engineering (BS CSE)

RESEARCH & PUBLICATIONS:

- **Data Mining Techniques to Categorize Single Paragraph Formed Self Narrated Stories**, 5th International Conference on ICT for Sustainable Development (ICT4SD-2020). ([Link](#))
- **Professional Information Visualization using Augmented Reality; AR Visiting Card**, 2nd International Conference on Sustainable Technologies for Industry 4.0 (STI-2020). ([Link](#))
- **Augmented Reality in Medical Education; AR Bones**, 2021 International Conference on Computing, Communication and Intelligent Systems (ICCCIS – 2021). ([Link](#))
